Breathe easier knowing the signs, treatment options for asthma; May is Asthma Awareness Month

Knowing if you or your child has asthma can be difficult because there may be more causes than just the known genetic, environmental and occupational factors.

Asthma is a disease that affects the lungs. It causes repeated episodes of coughing, wheezing, difficulty breathing and/or chest tightness. Approximately 50 percent of people with asthma have allergic triggers, which may include mold, dust mites, pollen, and pet dander. The other 50 percent of asthma attacks are caused by a range of factors such as exercise, aspirin, time of day and more.

Asthma often starts during childhood when the immune system is still developing. Having a parent with asthma, taking in cigarette smoke as a young child and exposure to viral infections can increase the risk of developing asthma.

Prevea Health Allergist, Dr. Dylan Timberlake says diagnosing asthma, especially in children under age five, may include a medical history review and a conversation about symptoms if present.

"Once asthma has been diagnosed, controlling the symptoms and triggers is manageable," says Dr. Timberlake. "Everyone's treatment plan will look different, but typically asthma can be kept at bay with monitoring and medication."

Wisconsin thawed: Weight restrictions end for northern Wisconsin highways

Warmer weather has reached northern Wisconsin, and the Wisconsin Department of Transportation (WisDOT) is ending Spring Thaw and Class II road restrictions for 15 counties of Zone 1 on Monday, May 22 at 12:01 a.m.

Class II roads include about 1,400 miles of state highways susceptible to damage from heavy trucks during the spring thaw period as frost leaves the ground. More information regarding frozen road declarations, Class II roadways, and roadway postings can be found on WisDOT's website. Further information also can be found online for divisible load permits and non-divisible load permits.
