

2022 Consumer Confidence Report Data

CUMBERLAND WATERWORKS, PWS ID: 60301329

Water System Information

If you would like to know more about the information contained in this report, please contact Dean Bergstrom at (715) 822-2595. **OPPORTUNITY FOR INPUT ON DECISIONS AFFECTING YOUR WATER QUALITY**

We want our valued customers to be informed about their Water Utility. If you want to learn more, the Utility Commission meets every fourth Tuesday of the month at 4:00 PM, in the conference room at the Cumberland Municipal Utility.

Health Information

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's safe drinking water hotline (800-426-4791).

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune systems disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers.

EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbial contaminants are available from the Environmental Protection Agency's safe drinking water hotline (800-426-4791).

Source(s) of Water

Source ID	Source	Depth (in feet)	Status
1	Groundwater	500	Inactive as of 01/01/21
3	Groundwater	385	Active
4	groundwater	295	Active

DEFINITIONS

HI HI Hazard Index: A Hazard Index is used to assess the potential health impacts associated with mixtures of contaminants. Hazard Index guidance for a class of contaminants or mixture of contaminants may be determined by the US EPA or Wisconsin Department of Health Services. If a Health Index is exceeded a system may be required to post a public notice.

Level 1 Assessment A Level 1 assessment is a study of the water system to identify potential problems and determine, if possible, why total coliform bacteria have been found in our water system.

Level 2 Assessment A Level 2 Assessment is a very detailed study of the water system to identify potential problems and determine, if possible, why an E. coli MCL violation has occurred or why total coliform bacteria have been found in our water system, or both, on multiple occasions.

MCL Maximum Contaminant Level: The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

MCLG Maximum Contaminant Level Goal: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

MFL million fibers per liter

MRDL Maximum residual disinfectant level: The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

MRDLG Maximum residual disinfectant level goal: The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

mrem/year millirems per year (a measure of radiation absorbed by the body)

NTU Nephelometric Turbidity Units

pCi/l picocuries per liter (a measure of radioactivity)

ppm parts per million, or milligrams per liter (mg/l)

ppb parts per billion, or micrograms per liter (ug/l)

ppt parts per trillion, or nanograms per liter

ppq parts per quadrillion, or picograms per liter

PHGS Public Health Groundwater Standards are found in NR 140 Groundwater Quality. The concentration of a contaminant which, if exceeded, poses a health risk and may require a system to post a public notice.

RPHGS Recommended Public Health Groundwater Standards: Groundwater standards proposed by the Wisconsin Department of Health Services. The concentration of a contaminant which, if exceeded, poses a health risk and may require a system to post a public notice.

Contaminant (units)	Site	MCL	MCLG	Level Found	Range	Sample Date (if prior to 2022)	Violation	Typical Source of Contaminant
								from fertilizer and aluminum factories
NITRATE (NO3-N) (ppm)		10	10	0.50	0.11 - 0.50		No	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits
SELENIUM (ppb)		50	50	1	0 - 1	8/5/2020	No	Discharge from petroleum and metal refineries; Erosion of natural deposits; Discharge from mines
SODIUM (ppm)		n/a	n/a	4.80	3.30 - 4.80	8/5/2020	No	n/a

Contaminant (units)	Action Level	MCLG	90th Percentile Level Found	# of Results	Sample Date (if prior to 2022)	Violation	Typical Source of Contaminant
COPPER (ppm)	AL=1.3	1.3	0.1900	0 of 10 results were above the action level.	8/26/2020	No	Corrosion of household plumbing systems; Erosion of natural deposits; Leaching from wood preservatives
LEAD (ppb)	AL=15	0	2.00	0 of 10 results were above the action level.	8/26/2020	No	Corrosion of household plumbing systems; Erosion of natural deposits

Poppy Poster Contest Winners!

Congratulations to the winners of the annual VFW Auxiliary Poppy Poster contest! From left to right are: 1st Place-Nova Fowler, 3rd Place-Oliver Montgomery, and 2nd Place-Andrew Montgomery. Pictured with the winners are Pam Mysicka from the American Legion Auxiliary and Principal Jim Richie. Eighty nine students participated in the Poppy Poster contest.

School Board...

Middle School Instrumental Teacher, and Kara Haughian as 5th Grade Teacher. A final Action Item renewed the current Girl's Soccer Co-op with Barron, which will include the addition of Bloomer next spring.

Discussion items began with an extensive update from Brandon Johnson, Director of Grounds and Buildings, on ongoing projects and summer work. Johnson gave the timeline for summer cleaning and work on gym floors, while discussing work projects in classrooms and the upcoming playground renovation at the Middle School, which will begin on June 5.

Johnson concluded his report by discussing the recent completion of an up-to-date fire alarm panel, the advantages from the recently purchased

freezer at the Elementary School, and the installation of a new curtain in the High School Gym, while adding his appraisal of potential District needs in the future.

The final business of the night included the Administrative reports from the building Principals and Superintendent Dr. Barry Rose.

High School Principal Ritchie Narges reported on the upcoming graduation ceremonies, the completed scheduling process of next year's classes, the incoming 8th grade transition schedule, and the Senior Award Banquet, where over \$150,00 in scholarships were handed out.

Elementary Principal Jim Richie covered end of the school year activities and the upcoming Summer School schedule, where

sign-up was done on Power School. Anyone still interested in signing up a child will need to contact the Elementary Office. Middle School Principal Colin Green, meanwhile, discussed a recent successful community clean-up project by his students, 8th Grade speeches, which begin May 30, and a number of transition activities for students moving into new settings in the fall.

Dr. Rose concluded the evening by discussing recent informational meetings held between Wold Architects and Engineers and school staff as they reviewed current facilities and structural needs moving forward. The Board then adjourned and moved into closed session.

The next Board Meeting is scheduled on Thursday, June 29 at 6:00 pm.

NOTICE OF HOSPITAL PRICE INCREASE

CUMBERLAND MEMORIAL HOSPITAL, INC.

Cumberland Memorial Hospital, Inc., d/b/a Cumberland Healthcare, located at 1705 16th Avenue, Cumberland, Wisconsin 54829, has a fiscal year beginning July 1, 2023 and ending June 30, 2024. Effective July 1, 2023, this hospital will implement a price increase that will increase total patient revenue by an average of 2 percent on an annualized basis. Date of last price increase within the past 12 months was July 1, 2022. Selected charge elements will change as follows:

DESCRIPTION	PREVIOUS RATE	NEW RATE	PRICE CHANGE	PERCENT CHANGE
Private room & Board - Medical Surgical	\$1,416.25	\$1,445.00	\$28.75	2%
Mammography (excluding physician fees)	\$244.11	\$249.00	\$4.89	2%
Emergency Room Level 3 Visit	\$528.39	\$538.50	\$10.11	2%
Emergency Room Level 2 Visit	\$271.92	\$277.50	\$5.58	2%
Physical Therapy Low Complexity Evaluation	\$219.39	\$223.50	\$4.11	2%
Bone Density	\$564.44	\$575.75	\$11.31	2%

The Hospital finds it necessary to increase prices in order to continue its commitment to provide quality healthcare with modern facilities, equipment and technology, to adjust salaries and benefits, and to keep pace with the increasing costs of providing care below cost reimbursement from government programs and other payers.
